The purpose of this research is to gather an und clothing within Taiwan, inspecting the transformatio fashionable, giving insight into the concept of childr introspection of the children's vogue phenomenon. clothing in Taiwan, the researcher has taken related cultural information regarding the East and the West methodology to cross reference numerous documen views and judgments, in an attempt to form a histori analysis, the findings were:

1. With the exception of children in their infancy, who practicality, girls wore shirts, skirts and trousers duri gowns, Ma Kua, shirts and trousers, identical to the colonial period, and children still wore miniature ve influenced by Europe and America, that Taiwan ente specialized designs for children gradually appeared.

2. After social-economic reforms and improvements introduced into Taiwan via Western ideas and medi in developed countries, which let to each child being concept of vogue being introduced into Taiwan.

3. Suggested introspections:

(1) Having understood the history behind children's children within the society, it is important that we su provide miniature versions or view it as an extensio

(2) We should pay attention to children's aesthetic ec style, fabric and design through the daily wearing pr spread into other parts of life itself.

(3) Brand is just a part of vogue itself, not a represent necessarily mean branded children's clothing.

(4) Faced with the trend of children's vogue, child de

combine their efforts and converse with each other, towards a new direction.
