Title: [Bargaining and Markets](#)

Author: Martin J. Osborne and Ariel Rubinstein

Publisher: Academic Press

Year: 1990

ISBN: 0125286325

Abstract: This is the only book that presents the modern strategic theory of bargaining in detail and describes, in a consistent framework, a number of recent applications of this theory to the study of markets. Bargaining and Markets discusses two recent developments: the use of the tool of extensive games to construct theories of bargaining in which time is modeled explicitly and the application of this theory to the study of decentralized markets. Written by two of today's leading economic game theorists, this book will serve as a textbook for courses in bargaining and markets and a supplemental text for graduate-level courses in game theory or bargaining.
