Abstract : The United States is dependent on foreign sources for many strategic and critical materials vital to its survival and national security. To counter the affects of a disruption in the supply of these materials, the US maintains a National Defense Stockpile (NDS) made up

of over a hundred separate depots located in various parts of the country. The management and policy formulation of various aspects of the NDS are distributed across a wide spectrum of agencies in the Executive and Legislative Branches. These organizations along with associated legislation are examined for their impact on the policy-formulation process. This thesis also reviews organizations outside the government that affect stockpile policy. General and specific recommendations on proposed management alternatives are presented at the end of the study. Keywords: National defense stockpile; Stockpile management; Stockpile policy; Strategic materials; Critical materials.

Descriptors : *STOCKPILES , SOURCES , UNITED STATES , POLICIES , NATIONAL SECURITY , ORGANIZATIONS , FOREIGN , MANAGEMENT , MATERIALS , FORMULATIONS , THESES , SURVIVAL(GENERAL) , SPECTRA , SUPPLY DEPOTS , LEGISLATION , NATIONAL DEFENSE , CRITICALITY(GENERAL) , STRATEGIC MATERIALS
