Abstract

This article explores the unique features offered by the latest handheld devices such as iPad and iPhone through their numerous educational application programs (widely referred to as apps) that have been identified. A number of useful and relevant iPad and iPhone apps for learning and teaching languages have been identified. A number of useful and relevant iPad and iPhone apps for learning and teaching languages have been identified. A number of useful and relevant iPad and iPhone apps for learning and teaching languages have been identified.

In particular, the more human-like interface features, offered by Apple devices such as iPad and iPhone, are of great interest. Preliminary studies by the author have demonstrated that students have a preference for using a smartphone. The unique touch interface, portability, low cost and readily availability of apps are amongst the factors that have led to the widespread use of these devices.
