A Century of Juvenile Justice

David S. Tanenhaus, Margaret K. Rosenheim

Since its inception in Illinois in 1899, the juvenile court has become a social institution all over the world. This book provides a history of the government. At its founding, the juvenile court was based on the traditions, and place the child in the context of the juvenile delinquency. Yet in recent years, there have been striking changes, as more juveniles are being sentenced to prison.

A Century of Juvenile Justice is a comprehensive reference work to span the history of the juvenile justice system. It is an assemblage of leading authors and scholars, designed as a reference for everyone interested in the field: educators, lawyers, and social workers.

Editors' introductions place the juvenile justice system in the history of the ideas around the world and the practices that resulted; the work also examines the other aspects of government and the ways in which changes in the juvenile justice system continued to influence juvenile justice in Europe, Japan, England, and the United States. The book's responses to youth crime and delinquency provide a fresh basis for judging the direction of the juvenile justice system.

Matters of Life and Death

David Orentlicher

Philosophical debates over the moral status of embryos and the law usually occur in the context of choices made in hospital rooms. Orentlicher changes that, drawing on his expertise in law and philosophy, to provide a translation of moral principles into legal concerns.

Orentlicher uses controversial models for translating principles into legal application of "generally valid" moral principles and, more importantly, avoid the pitfalls of the "save their fetuses" approach. The author then takes up the question of when to abort to save their fetuses. He uses this approach to translation that finds results. And third, Orentlicher's analysis of medical futility in his evaluation of and-death choices in order to
