### Abstract

This ultra-cool volume invites readers to tap into your inner geek and build seventeen ultra-cool wireless devices including a solar powered access point, a wireless picture frame that dynamically changes its own photos, and even a wireless car-to-car audio and video system. With a few simple tools, some off-the-shelf parts, and this book, readers will be creating

wireless devices they never thought were possible-toys that certainly can't be found at the local computer store

Written by the cofounder and members of the Southern California Wireless Users Group, this book provides readers with hands-on instruction and insider tips and tricks from those who are on the bleeding edge of wireless technology

New addition to the ExtremeTech line of books-books for serious technophiles
