This book is a rarity in medical publishing in the 21st century, a true monograph. The author brings his personal experience, which is considerable, to bear on surgical neuropathologic diagnostic material with frequent comments such as, “in my opinion...” and “I have seen...” This approach may startle modern readers who have become accustomed to books that read as though they were written by a committee, and that frequently have been. Not everyone will agree with Dr Miller's interpretation of particular entities, but at least they know whose opinion they are getting. The author is unafraid of venturing into controversy, for example, with regard to glioneuronal tumors or primitive neuroectodermal tumors; but he takes pains to give opposing viewpoints that have been expressed in the literature. The book is meticulously referenced, with citations as late as 2007; but even more important,...
