Book : [WHO classification of tumours of the digestive system](#) 2010 No.Ed. 4 pp. ref.3728

Abstract : This book is the third volume of the 4th Edition of the WHO series on the classification of tumours of the digestive system.

histological and genetic typing of human tumours. It is an authoritative, concise book providing an international standard for oncologists and pathologists and an indispensable guide for use in the design of studies monitoring response and clinical outcome. It also provides user-friendly algorithmic approaches to the diagnosis of the major tumours of the digestive tract. Diagnostic criteria, pathological features and associated genetic alterations are described in a strictly disease-oriented manner. Sections on all recognized neoplasms and their variants include new ICD-O codes, incidence, age and sex distribution, location, clinical signs and symptoms, pathogenesis, genetics and predictive factors. The book, prepared by more than 100 authors from 20 countries, contains some 700 colour photographs, numerous tables and figures and more than 3700 references.
