Abstract

Description: This unrivalled field guide covers over 1,400 species that inhabit our coasts including the invertebrates, fish, reptiles, and a selection of these, concentrating on the most frequently encountered shallow subtidal waters that can readily be explored by scuba divers on beaches and rocky shores, and aquatic estuarine animals and in tidal pools or by divers, or those frequently caught by anglers to meet the needs of scientists, students, fishermen, scuba divers, and enabling the identification of diverse species including mangroves.
