Abstract : An *exposé* is presented of the modern agricultural industry and its products. It is argued that many modern diseases (Alzheimer's, cancer, obesity, impotence) can be traced to the chemicals in our food from both industrial and environmental pollution. It is suggested that the modern multi-national food complex and fast-moving that it is impossible for the authorities to monitor the proliferation of new chemicals and irregular practices. The following issues are discussed: BSE, pesticides, additives, environmental pollution, industrial cover-ups, and food protection.
