## Book

Title	<b>Albert Einstein : a biography</b>
Author(s)	<a href="#">Fölsing, Albrecht</a>
Publication	New York, NY : Viking, 1997. - 882 p.
Note	Originally published in German as : Albert Einstein : eine Biographie
Subject code	<a href="#">92 Einstein</a>
Subject category	Biography, Geography, History
Abstract	Albert Einstein's achievements are not just milestones in the history of science; decades ago they became an integral part of the twentieth-century world in which we live. Like no other modern physicist he altered and expanded our understanding of nature. Like few other scholars, he stood fully in the public eye. In a world changing with dramatic rapidity, he embodied the role of the scientist by personal example. Albrecht Fölsing, relying on previously unknown sources and letters, brings Einstein's "genius" into focus. Whereas former biographies, written in the tradition of the history of science, seem to describe a heroic Einstein who fell to earth from heaven, Fölsing attempts to reconstruct Einstein's thought in the context of the state of research at the turn of the century. Thus, perhaps for the first time, Einstein's surroundings come to light.
