Abstract

Gardening for birds is both a great way to help our endangered feathered friends as well as a great pleasure in itself. This book offers a host of practical suggestions on feeding birds and providing opportunities for nesting and bathing. The reader is taken through the steps of planning a bird-friendly garden covering aspects such as pond construction, suitable plants, provision of nesting sites and food, pest control and garden maintenance. A directory of 80 common species aids identification and offers guidelines on the habitat, food and nesting requirements of each species.
