Abstract

Hari Seldon, the fictional creator of "psychohistory" in Isaac Asimov's "Foundation" series of novels, predicts the imminent demise of the First Galactic Empire after a 12 millennium run and establishes the Foundation on a planet at the galaxy's edge. In doing so, he initiates a chain of events aimed at reducing the duration of the dark ages between the first and second empires from a disastrous 30 millennia to a tolerable one. Seldon's plan is based on psychohistory – "that branch of mathematics which deals with the reactions of human conglomerates to fixed social and economic stimuli".
