# Transhumanism: toward a brave new world?

Bernard M. Daly

## Abstract

The conference did not target only the U.S. Christian right for opposing such things as stem cell research. It challenged every faith community that believes a human being is more than just one more biological product. The weekend of Aug. 7 was organized by the World Transhumanist Association. In 2005 its conference will be in Caracas, Venezuela, where this small band of transhumanists will continue to challenge all larger faith communities to review what they have to say about a "brave new world" that would carry us far beyond the engineered manipulations that seemed so distant when Aldous Huxley wrote in 1932 about creating babies in test tubes.
