Discovering Constructivism: How Project-Oriented Activity-Based Media Production Course Effectively Employed Constructivist Teaching Principles

[Glenn T. Hubbard](#)

Abstract

The author uses his experience leading a project-oriented special study in constructivist teaching methods. Citing relevant literature in the field, this paper considers why students chosen to work for a promotional video for a university program considered the practical academic learning experience. The author points out that constructivist education has long championed activity and project-based learning and educators could benefit from a deeper understanding of how it is effective.
