Economics of development.

Author(s) : <u>Gillis, M.</u> ; <u>Perkins, D. H.</u> ; <u>Roemer, M.</u> ; <u>Snodgrass, D. R.</u>
Book : <u>Economics of development.</u> 1992 No.Ed. 3 pp.xvi + 635pp.

Abstract :   This book is a general text concerned with the problems of econ
development. It aims to make extensive use of the theoretical tools of class
neoclassical economics in order to help contribute to the understanding of t
surrounding economic development, but also seeks to draw on decades of
study. It considers the experience of developing countries in relation to top
examination, including: China, the Korea Republic, Brazil, Sri Lanka, India, Ken
Tanzania, Colombia, Peru, Malaysia and Mexico. Part 1 of the book introduce
and measurement of development, some theories developed to explain it,
of data that has been amassed to recognize and define development when

It also includes a chapter on market versus controls as the means of guiding
Part 2 deals with the contribution of human resources to development, inclu
on population, labour, education and health. Capital, the other main physical
growth process, is the subject of part 3, dealing with savings and investmen
financial policy, foreign aid and investment. The opportunities provided by in
trade are considered in part 4, and part 5 applies the ideas developed in ea
to the major sectors of the economy: agriculture, natural resources, and inc
