Fraser and Paré's diagnosis of diseases of the chest. 1-4.

Author(s) : [Fraser, R. S.](#) ; [Müller, N. L.](#) ; [Colman, N.](#) ; [Paré, P. D.](#)

Book : [Fraser and Paré's diagnosis of diseases of the chest. Volumes 1-4.](#) 1999
3190 pp.

Abstract : This fourth edition has changed to reflect the increased availability of diagnostic procedures and figures have been added to illustrate various abnormalities that they can identify. The 21 chapters of the previous edition have been expanded to 79. Volume 1 is divided into 4 main sections: the nomenclature of chest disease; investigative methods in chest disease; radiologic signs of chest disease; and

developmental lung disease. Volume 2 is divided into 2 main sections: pulm infection; pulmonary neoplasms. Volume 3 is divided into 4 sections: immun disease; embolic lung disease; pulmonary hypertension; and disease of the Volume 4 is divided into 8 sections: pulmonary disease caused by inhalation of particulates, solids or liquids; pulmonary disease caused by toxins, drugs irradiation; traumatic chest disease; metabolic pulmonary disease; pleural di mediastinal disease; disease of the diaphragm and chest wall; and pulmona associated with a normal chest radiograph. An appendix containing 17 table diagnosis and an index are included in volume 4.
