[Systematic embryology of the angiosperms.](#)

Author(s) : [DAVIS, G. L.](#)

Book : [Systematic embryology of the angiosperms.](#) 1967 pp.528 pp.

Abstract : In this valuable reference book, which coordinates numerous studies, the author stresses the relevance of embryological studies to plant breeders. The introduction discussing the taxonomic importance of embryological characters. Families are described systematically in alphabetical order, for easy reference. Those families are those recognized in the latest taxonomic system of classification by Hutchinson. The language used is technical and the book would have been greatly improved by an informative glossary. A list of authors follows each description and a very la

extensive bibliography is included, as well as an author index.
The contents of this book are well presented but the lack of diagrams or photos is very noticeable, especially on a topic which lends itself to illustration.

Record Number : 19671605362

Publisher : John Wiley & Sons.
