Abstract

The aim of this study is to propose a requirement model that serves as a basis for information. Ploughing incentive is given by the Malaysian Government to district farmers association or Pertubuhan Peladang Kawasan (PPK). Eligible farmers are entitled to receive the incentive. Ploughing work can only be done by registered farmers. The assignment of ploughing work is done by the PPK. MADA would then disseminate and reports furnished by PPKs. The current manual practice of reporting ploughing work is a major omission. A computerized system that would cater the information of ploughing work is currently no such system, a requirement model will be produced. The requirements of the system will be gathered from one PPK in Kedah through observation. The model which comprises of two actors and 17 use cases is validated by users using
