CULMINATING PROJECT MANAGEMENT

Developing a Job Portal in Sugar Agile Methodology

[Pavan Teja Ambisetty Ramamurthy, SCSU](#)

Date of Award

11-2015

Culminating Project Type

Thesis

Degree Name

Engineering: M.E.M

Department

Mechanical and Manufacturing Engineering

College

College of Science and Engineering

First Advisor

Dr. Ben Baliga

Second Advisor

Dr. Hiral Shah

Third Advisor

Dr. Balasubramanian Kasi

Keywords and Subject Headings

CRM, Agile, Software, Development

Abstract

The main objective of this project was to collect the data and identify the problems faced by a huge organizations, which holds the data. The challenge here was to generate an enterprise level dashboard that displays a number of job applications for a particular domain and the application management evaluates or analyzes the functioning and progress of the Job portal developed with Sugar CRM.

Agile methodology supports a rapid, iterative, lean development process that is driven. The team focused on the decision driven rather than data driven and concentrated on the necessities of the decisions to be made, rather than on existing data. While following this, organization totally relied on data for business opportunity management. This project can be useful for the company to monitor the recruitment processes effectively.

Lean Management principles have been strongly monitored and applied throughout the project.

Comments/Acknowledgements

This Project would not have been possible without the kind support of several individuals and organizations. I would like to extend my sincere thanks to

I am highly indebted to Dr. Ben Baliga and Dr. Hiral Shah for their constant supervision during my study at St. Cloud State University. I also thank Prof. Gary Nierengarten and Dr. Balsy Kasi for reviewing my work.
