Book

Title	Advanced field theory : micro, macro, and thermal physics
Author(s)	Umezawa, Hiroomi
Publication	New York, NY : AIP, 1995. - 238 p.
Subject code	530.145
Subject category	General Theoretical Physics
Abstract	This work begins by distinguishing the difference between quantum mechanics and quantum field theory. It then attempts to extend field theory by adding a thermal degree of freedom to phenomena occurring within a vacuum. The resulting quantum field theory is called Thermo Field Dynamics (TFD).
