[Large animal neurology: a handbook for veterinary](#)

Author(s) : [Mayhew, I. G.](#)

Author Affiliation : Coll.Vet. Med., Univ. Gainesville, Florida, USA.

Book : [Large animal neurology: a handbook for veterinary clinicians.](#) 1989 pp.380

Abstract : This book with its lovely dedication "to all the patients that through misfortune, taught me neurology" - is intended for veterinary surgeons in clinical practice to use for reference and as a guide in handling cases of neurologic disease. The author hopes that it will also be useful for veterinary students during their clinical years and post graduates studying neurology. There are 2 parts: the first presents the information needed by the veterinary surgeon to approach large animal neurological cases.

divided into 4 chapters, clinical neuroanatomy, neurological evaluation, ancillary diagnosis and pathological responses of the nervous system. The second part (two chapters) deals with the different conditions including disorders of behavior and personality, seizures, visual dysfunction; coma and altered states of consciousness, cranial nerve dysfunction (III-VII, IX, X, XII), vestibular abnormalities, deafness, spasms and movement disorders, cerebellar diseases, forms of paralysis and weakness and miscellaneous disorders. There is an appendix with a selection of congenital and hereditary neuromuscular diseases and a good subject index. The book is well illustrated.
