 **General microbiology.**

Author(s) : [STANIER, Y.](#); [DOUDOROFF, M.](#); [ADELBERG, E. A.](#)

Book : [General microbiology](#) 1958 pp.xxii + 682 pp.

Abstract : This very useful treatise contains much information of interest to microbiologists and plant pathologists in connexion with the life-histories and other aspects of bacteria, and viruses and the diseases which they cause. Part I is concerned with the general properties of micro-organisms, 2 with their ecology, and 3 with the biological control of plant diseases. Chapter 2 (pp. 26-52) deals with the development of microbiological methods; Chapter 3 (pp. 53-98) with fungi (as members of the group of higher protists); and 29 (pp. 56-98) with bacterial diseases of plants and their control; while many relevant items are mentioned throughout other sections of more general aspect.

Record Number : 19581102009

Publisher : London, Macmillan & Co. Ltd.

Language of text : not specified

Language of summary : not specified

Indexing terms for this abstract:

Organism descriptor(s) : fungi, viruses

Descriptor(s) : bacterial diseases, control, ecology, life history, microbiology, mic

Identifier(s) : bacterial infections, bacterioses, bacterium, fungus, micro-organism

Broader term(s) : eukaryotes
