

South African red data book – Birds

Brooke, RK

URI: <http://hdl.handle.net/10204/2015>

Date: 1984-12

Abstract:

Red data sheets are provided for 102 species of birds that breed on the South African mainland and islands. Species are listed according to the established IUCN criteria of extinct, endangered, vulnerable. Each sheet is accompanied by a list of published sources and most by a distribution map. Of the 108 species, 102 have been allocated to the endangered category, also on a local basis. Twenty one species are vulnerable, 10 species are as yet indeterminate. Indications of past research effort and of future needs in both research and conservation are given together with a comprehensive rare species bibliography.
