Planning without facts, lessons in resource allocation from Nigeria's development.

Author(s) : [STOLPEK, W. F.](#)

Book : [Planning without facts, lessons in resource allocation from Nigeria's development](#)
pp.348 pp.

Abstract : The book systematically examines how to deal with actual problem development planning when time and information are limited. Chapter I examines the theoretical background and discusses the characteristics of planning in Africa and the Sahara, including the lack of important facts and the absence of a population

deals specifically with the Nigerian situation. III describes a general approach as one goes along, which can be used where information is insufficient. IV c use of aggregative data. V deals with the translation of the general view on profitability or social productivity into specific investment criteria. VI and VII t: fiscal and economic policies which are the link between the nation and the v and between government and the private sector. VIII discusses the relation economics and politics. J. K.
