### Abstract

The United Nations' presence in Sierra Leone has made that country a subject of international attention to a degree. Once identified as a source of 'the New Barbarism', it has also become a proving ground for Western war against terrorism. The conventional diplomatic approach to Sierra Leone's civil war is that it has been clearly defined sides. Keen demonstrates this is not the case: the various armed groups were fractured and often colluded with one another, and had little interest in bringing the war to an end. This book not only offers an innovative approach to the study of war and Third World development and politics generally.
