VOLUNTARY SERFDOM: AN IDEOLOGICAL JOURNEY INTO DUALCLASS LABOR CONFLICTS, AND POSSIBLE WORKERS' SOLUTIONS

Abstract

This article identifies my paradigm shift toward greater acceptance of conflict and alienation sociologies from Marx and from Seeman. Having never been a follower of their sets of ideas, ample evidence has been found in recreational and sociological literatures, and at work, to support the contention that they are more important that I had previously thought. This conclusion is derived from reviewing a variety of novels, poems, a travelogue, sociological findings on dual- and antagonistic-class structures, data about alienation, and putting a theoretical twist to Merton's goals-means model of adaptation.
