### **Abstract:**

M.K. Gandhi's social and environmental thought continues to shape the contemporary practices of Brahma Vidya intentional community in Paunar, Maharashtra. Since its founding in 1959, members have wrestled with the practice of translating Gandhian values such as self-sufficiency, non-violence, voluntary simplicity, and public service into food production and consumption. Members of Brahma Vidya Mandir and associated farmers imagine and enact responses to contemporary agrarian failures in religiously inflected language drawn from the Bhagavad-Gita, a central Hindu text. This article uses this text as a guide to develop agricultural practices that they deem non-violent. Brahma Vidya Mandir's existing counter-narrative prompts our imaginings of what it means to enact alternative agricultural and social practices and opens new possibilities of adapting and applying these ideas to other social and geographic contexts.
