**African traditional medicine: a dictionary of plant use and applications. With supplement: search system for diseases**

Author(s) : [Neuwing, H. D.](#)

Book : [African traditional medicine: a dictionary of plant use and applications. With supplement: search system for diseases](#) 2000 pp.599 pp.

Abstract : A reference book was compiled to document our knowledge of African plants with their richness in variety of species and their use in traditional medicine. The book is made to more than 5400 plants and over 16 300 medicinal applications. Information on active principles has been consistently omitted; only a very few of the remedies

been clinically tested. The book lists the plant species alphabetically by their names. The supplement contains an index of the diseases and ailments ref species descriptions. The main illnesses targeted by African herbal medicin infectious gastroenteritis, diarrhoea, dysentery, malaria, diabetes, measles, tuberculosis, pneumonia, smallpox, gonorrhoea, tropical ulcers, schistosom onchocerciasis, trypanosomiasis, worms (especially Guinea worm), tachycar back pain, and snake-bites. This book is mainly intended for scientists worki of phytochemistry and pharmaceutical chemistry, searching for medicinally ; for further research. KEYWORDS: TROPAG | drug plants | plant resources | properties | uses | traditional technology | human diseases | Central Africa
