## Isolation and identification of drugs in Pharmaceuticals, body fluids, and post-mortem material. Vol. 2.

Author(s) : [CLARKE, E. G. C.](#)

Editors : [CLARKE, E. G. C.](#)

Book : [Isolation and identification of drugs in Pharmaceuticals, body fluids, and post-mortem material. Vol. 2.](#) 1975 pp.873-1258 pp.

Abstract : The deserved success of Volume 1 of this book, which appeared in *[Abstr. Hyg., 1969, v. 44, abstr. 3161]*, has led to the early appearance of this second volume. The interval between the two is relatively short but the number and

the calls upon the analyst have also increased greatly during the last quinquennium. The first part, which is on analytical technique, deals with the screening of biological fluids for the purposes of clinical toxicology. It has been re-written and extended and now includes contemporary analytical methodology involving the use of sophisticated analytical equipment. Information is presented which supplements many of the original data. Volume 1-on general screening, on extraction methods, on chromatography (paper, thin-layer and gas), on absorption spectrophotometry, colour tests, fluorescence spectrometry and radioimmunoassay. As before, clear directions are given, illustrated by simple diagrams.

Part 2 is a series of monographs on drugs, including 250 extra compounds added since the first volume, arranged alphabetically. Each monograph is a complete guide to the compound. Perhaps the most useful of all are the indices to analytical data assembled in Part 3, with long lists of data given under each item, for example, melting-points, absorption maxima, and refractive indices. Appendices on reagents, special tests and an up-to-date bibliography complete the volume which is served by a good general index and a loose-leaf pamphlet with some minor addenda for 1975.

As a companion and supplement to Volume 1, or as an alternative to that book, this second volume will, I feel sure, continue to occupy a place of prominence in all well-equipped analytical laboratories. *J. D. P. Graham*

Other books reviewed in the February issue and in this issue:

*Abstr. nos*

279 Industrial waste, handling, disposal and re-use.

324 Politics of family planning in the Third World.

546 Comprehensive virology. Vol. 1.

547 Advances in virus research. Vol. 18.

684 [. . . Malaria. . . eradication in Georgian S.S.R.]

708 [Basic communal hygiene.]

743 Occupational health. . . sources of information.

756 Maternity care.

789 Serological epidemiology.

790. . . Diseases and immunization in S. Australian schoolchildren. 801 Infectious diseases: epidemiology and clinical practice.

832 Short textbook of medical microbiology.

833 Human intestinal flora.

834 Normal microbial flora of man.

ISBN : 0853690952

Record Number : 19752701096

Publisher : The Pharmaceutical Press, 17 Bloomsbury Square, London WC1A2NN
